

SPACE SHUTTLE TECH

Eco-friendly and long-lasting, this coating combines nano technology with ceramic beads to form a thermal insulating and breathable shield around (or inside!) your property. First used on the NASA space shuttles to handle the heat of reentry, the nano technology found in our Zeramic Extrem nano coating is proven to decrease energy costs and provides our clients with a time-tested spray that works inside and out.

Who We Are

Thermal Coatings New England are the licensed dealers of thermal coatings for the New England region and beyond. We believe in creating affordable pathways to a net-zero future. The power to reduce your carbon footprint has never been easier than with Thermal Coatings New England.

THERMAL COATINGS
NEW ENGLAND

VERSATILE APPLICATION

- EXTERIORS:
STUCCO, BRICK, WOOD, METAL, VINYL
- INTERIORS:
WALLS (INCLUDING BASEMENTS)
- ROOFS:
COMMERCIAL ROOFS WITH 2/12 PITCH
MINIMUM

BENEFITS

REFLECTIVE INSULATOR:

Protects the exterior envelope and can reduce heating and cooling up to 35%

NOISE REDUCTION:

Reduce outside noise, so you can sleep better and work without outside distractions.

UV RESISTANT

Effectively reflects the sun's rays, improving thermal capacity and reducing color fade.

ALLERGY-SAFE

Because our coating does not release chemical substances and has low VOCs, it's the ideal for people with allergies.

WATERPROOF

Repels water and extreme weather, while preventing mold, rot, and algae.

ANTIMICROBIAL

Making it perfect for medical and food-handling buildings. It is also mold and mildew resistant.

SAVE MONEY

Reduces Energy Costs

By reducing energy costs by up to 35%, you can yield massive savings.

Save Money

This is a tax credit-qualifying product.

Increase Resale Value

By modernizing your home and providing future cost savings, potential buyers are more likely to bid higher.

Protection that Lasts

Our coatings are proven to last in extreme heat and cold, as well as well as coastal climates with high salt.

SAVE THE PLANET

Net zero has never been more accessible than now. Our coating systems not only provide beautiful, seamless finishes, but they also make a positive impact in the community. Use our nano coating to help lower your carbon emission footprint, reduce allergens and microbes inside a building, decrease noise, waterproof your home, and more.
